

## Why choose us?

### Flexible degree programmes

- Experience all of our subjects before choosing your own specialism at the end of your first year.
- Transfer to Medicine or Dentistry scheme.
- Range of optional modules to customise your degree – forge your path based on your own interests.

### Excellent student support

- Substantial academic support team including dedicated advisors for careers/employability, study abroad, placements, and pastoral support.  
Each student has easy access to a personal tutor and phase advisor for personal, pastoral and academic support.
- Award winning Careers Service: <https://www.ncl.ac.uk/careers/>
- A wide range of Faculty and University support services are available, including study skills, maths and writing support.

### Graduate employability

- Professional placement year, and summer placement opportunities, including overseas.
- Exchange opportunities – experience study/work outside of the UK by taking a short or year-long exchange overseas.
- Part-time laboratory assistant roles available in our world-class Research Institutes.

### Russell Group status

- Teaching delivered by world-renowned researchers.
- Research projects available in areas including cancer research, neuroscience, genetic medicine, immunology, and ageing.
- Access to state-of-the-art laboratory equipment and facilities.
- Extended research period on our MSci programme.

### A fantastic city

- Newcastle's social life is highly rated by students in the Times Higher Education Student Experience Survey.
- A big city in a small space, with a large student population, excellent sports teams, arts, culture and lots of green spaces
